Instructions for the PERFECT Motorcycle Key Chain
-- An Exclusive RidersInfo.net Product

1) Pull loop thru key hole.

2) Pull side with bead thru loop on opposite side of key. Pull until tight around key.

3) Pull bead close to key to prevent bead from touching any part of your motorcycle. Use bead to adjust size when wearing keychain on your wrist.

Watch for wear of your keychain and replace when/if nylon loses its elasticity and no longer remains tight against the key.
